ABOUT US

DIMULTI MUSIC began as a conversation between two music innovators who recognized a gap in the industry:

The need for a truly flexible and fully integrated music partner. Drawing on a combination of academic training, label-running experience, and the journey of a rising producer turned international collaborator, the company was built to handle every stage of a project, whether large in scale or highly specialized.

Today, **DIMULTI MUSIC** provides seamless service for both individual artists and corporate clients, supporting projects from initial concept to mastering and release.

While we cover the full range of music production, our core expertise lies in bold hip hop and modern R&B, where we consistently push creative boundaries and deliver standout results.

TRACK RECORD

Our track record speaks for itself: collaborations with Indonesian stars like **Yoda Idol, Dion Idol, and Novia Bachmid**, as well as partnerships with U.S. hip hop producers whose work has appeared on major-label playlist and even the Grammy stage.

“ Every project is tailored to your goals, with a focus on speed, authenticity, and uncompromising quality. ”
