

TRC Certification - Type approval for Cambodia

(And Why It's Important)

What is TRC Certification

To access the Cambodian market, especially for ICT products, manufacturers must comply with a compliance instrument called “TRC certification.”

TRC stands for “Telecommunication Regulator of Cambodia.” This organization is a public legal entity that performs its functions and duties through autonomous administration and regulation, as well as being independent of telecommunications operators and individuals related to the telecommunications sector.

1 What are the document requirements?

1. Authorized local company in Cambodia (It can be the importer, distributor, or the agency)
2. Product Identity: Product name, brand/trademark, model name, origin country, factory information (name and address).
3. RF report
4. EMC report
5. Safety Report or CB Cert & CB Report
6. Health or EMF or SAR Test Report
7. Certificate of Conformity or EU Type Examination Certificate
8. Technical Specification/Product Description
9. User Manual

2

Who should be applicant?

Certificate holder for Cambodian TRC certification is Distributor, importer, or brand local representative in Cambodia. If those parties are not available, it is allowed to appoint one company representation such as the agency, to be the certificate holder.

3 Is local testing mandatory?

Product testing on the Cambodia TRC is not mandatory. The certification process is paperwork-based by evaluating the existing reports issued by international labs accredited to ISO/IEC 17025. Required reports are RF report, EMC report, Safety Report or CB Cert & CB Report, Health or EMF or SAR Test Report, and Certificate of Conformity or EU_Type Examination Certificate.

4

What are the sample requirements?

No sample is required. The process is based on a paperwork approach.

5 How to get Type Approval certificate with paperwork?

The certification process in Cambodia is paperwork-based by evaluating the existing reports issued by international labs accredited to ISO/IEC 17025.

Required reports are RF report, EMC report, Safety Report or CB Cert & CB Report, Health or EMF or SAR Test Report, and Certificate of Conformity or EU_Type Examination Certificate.

6

How long is the lead time?

The lead time is 15 working days after the application is accepted.

7 How long is the validity of Certificate?

TA certificate has no expired date (Valid forever). One certificate is issued for one model and one country of origin.

8

What are the requirements of TRC Certification Label?

There are no specific labeling requirements for devices with TRC Type Approval.
